

**Are Eyelets Needed?**

Eyelets are 10mm. Place a 3mm magenta dot (or contrasting colour) on the artwork 25mm from edges and/or corners where required. Usually one in each corner and every 500mm.

**STANDARD SIZES**

450 x 600mm  
450 x 900mm  
600 x 900mm  
900 x 1220mm  
2440 x 1220mm

3000 x 1500mm  
3600 x 1500mm  
4000 x 2000mm  
Custom Sizes Avail.

**BLEED AREA**

25mm

Extend backgrounds and images on the edges past the trim line and to the edge of the bleed area.

**TRIM LINE**

The finished size of the sign.

**SAFE AREA**

30mm margins

Keep all text and logos etc. inside this area to make sure nothing important gets cut off.  
Also allows for fixings and/or eyelets

- Use CMYK colour profile
- If photos are used as part of the design, they need to be in high resolution, minimum 300dpi
- Leave a 30 mm margin on all edges to allow for fixings and/or eyelets
- Fonts should be embedded or preferably converted to curves
- Do not use PMS colours
- Use a breakdown of C20/M20/Y20/100K for rich black. Using just black (greyscale) results in a grainy print.
- Do not include colour profiles
- Do not include crop mark or registration marks
- 25 mm bleed
- If background is white use a thin black border (inc bleed) to show trim area
- Supply as a PDF file including bleed
- Supply at 100% size unless requested otherwise

**PRINT READY** files must be supplied to the above specifications. If the file does not meet the specifications a fee will be charged to make the file print ready.
