WOLFPACK PRINT
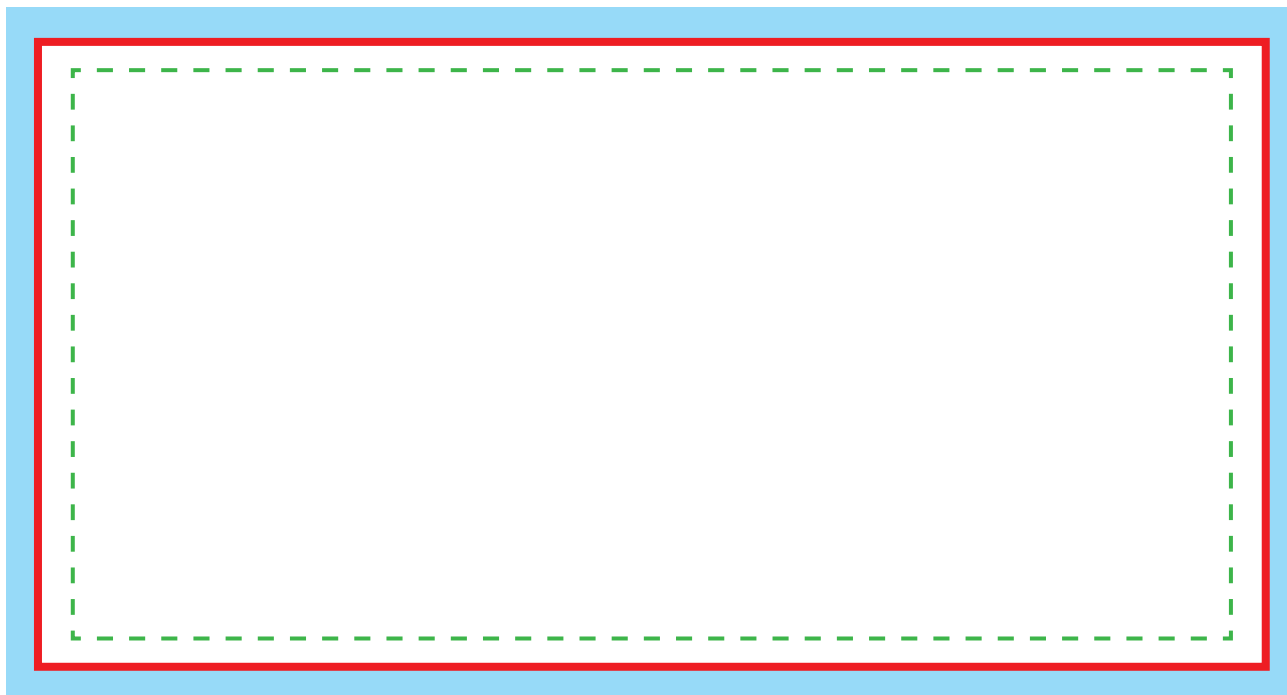

VINYL BANNERS WITH EYELETS
(HP WIDE FORMAT PRINT)

Eyelets
Eyelets are 10mm. Place a 3mm magenta dot (or contrasting colour) on the artwork 25mm from edges and/or corners where required.
Usually one in each corner and every 500mm.

CUSTOM SIZES
Custom Sizes Avail.
Up to 1400mm high.

BLEED AREA
20mm
Extend backgrounds and images on the edges past the trim line and to the edge of the bleed area.

TRIM LINE
The finished size of the banner.

SAFE AREA
50mm margins
Keep all text and logos etc. inside this area to make sure nothing important gets cut off.

- ❑ Use CMYK colour profile
- ❑ If photos are used as part of the design, they need to be in high resolution, minimum 300dpi
- ❑ Leave a 50 mm margin on all edges to allow for eyelets
- ❑ Fonts should be embedded or preferably converted to curves
- ❑ Do not use PMS colours
- ❑ Use a breakdown of C20/M20/Y20/100K for rich black. Using just black (greyscale) results in a grainy print.
- ❑ Do not include colour profiles
- ❑ Do not include crop mark or registration marks
- ❑ 50 mm bleed
- ❑ If background is white use a thin black border (inc bleed) to show trim area
- ❑ Supply as a PDF file including bleed
- ❑ Supply at 100% size unless requested otherwise

PRINT READY files must be supplied to the above specifications. If the file does not meet the specifications a fee will be charged to make the file print ready.
