

CUSTOM SIZES

OPENING HOURS
Monday - Friday
9am - 5pm

Saturday & Sunday
Closed

PLEASE NOTE: text and lines must be a minimum of 3mm thick.
Any finer and the cutting machine may not cut properly.

BLEED AREA
5-10mm

Extend backgrounds and images on the edges past the trim line and to the edge of the bleed area. 5mm for small decals, 10mm for large decals. Check with printer how much bleed will be needed.

CUT LINE

The line the plotter will follow to cut the vinyl to size/shape

SAFE AREA
30mm margins

Keep all text and logos etc. inside this area to make sure nothing important gets cut off.

- Use supplied Contour Cut swatch to create a cut line
- If photos are used as part of the design, they need to be in high resolution, minimum 300dpi
- Leave a 3 mm margin from the cutline for any important text or images
- Fonts should be converted to curves
- Any text or lines that are being cut to shape must be a minimum of 3mm thick
- Sharp points must be rounded by a minimum of 0.5mm
- Do not include crop mark or registration marks
- Supply as a PDF file including bleed
- Supply at 100% size unless requested otherwise

PRINT READY files must be supplied to the above specifications. If the file does not meet the specifications a fee will be charged to make the file print ready.
