## CUSTOM SIZES

PLEASE NOTE: Bleed 15mm bottom and right edges only

BLEED AREA
15mm bottom and right edges only
Extend backgrounds and
images on the edges past
the trim line and to the
edge of the bleed area.

TRIM LINE
The finished size of
the window.

SAFE AREA
20mm margins
Keep all text and logos
etc. inside this area
to make sure nothing
important gets cut off.

- ❑ Use CMYK colour profile
- ❑ If photos are used as part of the design, they need to be in high resolution, minimum 300dpi
- ❑ Leave a 20mm margin on all edges
- ❑ Fonts should be embedded or preferably converted to curves
- ❑ Do not use PMS colours
- ❑ Use a breakdown of C20/M20/Y20/100K for rich black. Using just black (greyscale) results in a grainy print.
- ❑ Do not include colour profiles
- ❑ Do not include crop mark or registration marks
- ❑ 15mm bleed on bottom and right hand edges only
- ❑ If background is white use a thin black border (inc bleed) to show trim area
- ❑ Supply as a PDF file including bleed
- ❑ Supply at 100% size unless requested otherwise

PRINT READY files must be supplied to the above specifications. If the file does not meet the specifications a fee will be charged to make the file print ready.
